Once again the athletic department is being made out to be something it is not. We had a department meeting today at 11 and there are very upset people who wonder when the facts are going to be stated correctly and when our department can be heard. It is effecting all of our teams and coaches. One kid writes a blog filled with misinformation and no one saying it is not true. This does not represent our department, our athletes and the university correctly. It is making our football team out to be horrible human beings and that is far from the truth. We are not perfect and we make mistakes and sometimes say things we should not. That being said we as a department would not let these things happen without investigating them and handing out discipline if necessary.
